ULSTER COUNTY TRANSPORTATION COUNCIL

FFY 2025 ANNUAL FEDERAL AID OBLIGATION REPORT

Reporting Period
October 1, 2024 to September 30, 2025

October 10, 2025

This report was funded in part through grants from the Federal Highway Administration and Federal Transit Administration, divisions of the U.S. Department of Transportation. The views and opinions expressed herein do not necessarily reflect those of the U. S. Department of Transportation.

ULSTER COUNTY TRANSPORTATION COUNCIL

PO Box 1800
244 Fair Street, 3rd Floor
Kingston, New York 12402-1800

P: (845) 334-5590
F: (845) 340-3429
<https://uctc.ulstercountyny.gov/>

BACKGROUND

UCTC is responsible for the development of a Metropolitan Transportation Plan (MTP) and a Transportation Improvement Program (TIP) that encourages and promotes the safe and efficient development, management, and operation of surface transportation systems to serve the mobility needs of people and freight in the county and the region. In addition, UCTC is responsible for the development of a Unified Planning Work Program (UPWP) that includes a discussion of the planning priorities facing the Metropolitan Planning Area. The intent of such a work plan is to coordinate all transportation-related planning activities in Ulster County.

The U.S. Department of Transportation requires every metropolitan area with a population over 50,000 to have a designated MPO in order to qualify for the receipt of Federal highway and public transportation funds. In 2003, the Governor of New York State designated the Ulster County Transportation Council (UCTC) as the MPO responsible for transportation planning in Ulster County. As the designated MPO, the UCTC is responsible for making final decisions for programming transportation improvements in the Kingston Urbanized Area and a portion of the Poughkeepsie-Newburgh Transportation Management Area (TMA).

Federal regulations require a listing of all federally funded projects on the TIP, for which federal transportation funds have been obligated in the preceding year. An obligation is the U.S. Department of Transportation's legal commitment to pay the federal share of a project's cost. Projects for which funds have been obligated are not necessarily initiated or completed in a given program year and the amount of the obligation in a single year will not necessarily equal the total cost of the project. This annual listing of federal aid obligations must be made available for public review by the Metropolitan Planning Organization (MPO). The listing must be consistent with the funding categories identified in the adopted Transportation Improvement Program (TIP).

TRANSPORTATION IMPROVEMENT PROGRAM

The TIP is a five-year financial plan that identifies the project costs, funding sources, phase types and implementation schedule of federally funded transportation improvements. TIP projects must be consistent with the overall goals and objectives identified in the Long Range Transportation Plan. The TIP can be viewed online at:

<https://uctc.ulstercountyny.gov/core-documents/transportation-improvement-plan-tip/>

The TIP typically receives a number of amendments and revisions throughout its 2-3 year lifecycle.

LONG RANGE TRANSPORTATION PLAN

A Federal Aid Obligation Report together with the Metropolitan Transportation Plan (MTP) helps to evaluate an MPO's overall performance. Financial forecasts from the MTP help establish a baseline for which federal aid obligations can be compared and help measure an MPO's ability to implement projects. The UCTC Year 2050 MTP can be viewed online at: <https://uctc.ulstercountyny.gov/core-documents/long-range-transportation-plan-lrtp/>.

A continuation of underperforming Federal Aid Obligation Reports may indicate one or more of the following: 1) financial forecasts improperly calculated; 2) a downturn in the economy resulting in less federal aid available for programming; 3) the complexity of the federal aid process; 4) insufficient local funding to match the federal aid projects programmed; and 5) changing priorities and project schedules.

FEDERAL AID OBLIGATIONS

To ensure that the public has an accurate account of how federal funds are actually being spent on transportation projects, USDOT requires that the organizations responsible for approving the Transportation Improvement Program publish an annual listing of project obligations.

Obligation in the context of this report is the Federal Government's legal commitment to pay the federal share of a project's cost. An obligated project is one that has been authorized by the federal agency as meeting eligibility requirements for federal funds. Projects for which funds have been obligated are not necessarily initiated or completed in the program year. For obligations on a construction project, typically the project needs to complete a competitive bid process and begin construction if an acceptable bid is received. Alternatively, projects may have obtained permission to proceed to construction using local funds, with the ability to be obligated and reimbursed with federal funds at a later date. Some of the projects or project phases listed in this report may already have been completed.

The amount of the obligation usually does not equal the total cost of the project. This is because an obligation is typically for only one phase of a multi-phased project. The obligation only accounts for federal funds allocated to the project. The figures exclude any matching state and local funds that are likely necessary as well.

Once funds have been obligated, the project sponsor/lead agency begins incurring eligible project expenses and then requests reimbursement from the eligible grant recipient. The reimbursement request must demonstrate that the recipient incurred the costs consistent with the project agreement and all federal requirements.

The list of obligated projects is organized in a manner consistent with the Transportation Improvement Program (TIP). For each project identified, the list includes the following:

- ▶ **PIN:** a Project Identification Number (PIN) that NYSDOT uses to track projects;
- ▶ **Project Sponsor:** the lead agency in charge of carrying out the project;
- ▶ **Project Title:** a narrative description used to define the nature and location of the project;
- ▶ **Phase:** the phases for which funding was actually obligated during the federal fiscal year;
- ▶ **Federal Fund Source:** the federal program from which funding was derived;
- ▶ **Amount:** the amount funding found to be obligated on the project during FFY2025;

Project Phases

Phases of TIP projects are categorized in the following manner:

- ▶ **Scoping:** This phase includes meetings with project developers and designers, local government representatives, and other involved parties. Decisions are made regarding specific elements that will be included in the project and the range of design alternatives that will be investigated.
- ▶ **Preliminary Design/Engineering (PD):** This phase includes basic engineering work on each alternative, traffic studies, environmental analyses, and other work specific to the project. Public outreach in accordance with state and federal requirements is used to gain community input on the project. A preferred alternative is selected to advance the project.
- ▶ **Detailed Design (DD):** This phase includes detailed engineering work on the preferred alternative. This phase results in the development of plans and specifications that a construction contractor will work from.
 - ▶ (PE: covers all phases for design – Scoping, Preliminary Design & Detail Design)
- ▶ **Right-of-Way Incidentals (RI):** This phase includes preparation work required prior to right-of-way acquisition.
- ▶ **Right-of-Way Acquisition (RA):** This phase includes the acquisition of right-of-way (property) necessary to complete the project. Acquisition can be achieved through the purchase of property or an easement.
 - ▶ (ROW: covers both RI and RA phases)
- ▶ **Construction (CONST):** This phase includes all work necessary to build the project.
- ▶ **Construction Inspection (CI):** This phase includes ongoing inspection to ensure construction is performed properly and conforms to specifications.
- ▶ **Miscellaneous/Other (MISC):** This phase is usually associated with public transportation projects. It involves the purchase and acquisition of vehicles and associated preventive maintenance, though in some cases, such as for station, parking, and maintenance/storage facilities, the construction of fixed or permanent facilities is undertaken. This phase type also includes funding for agency staff and/or contractors to perform work that supports the transportation system (e.g., bridge inspection, traffic center operations, etc.).

FEDERAL FISCAL YEAR 2025 FEDERAL AID OBLIGATIONS

As shown in the tables on the following pages, a total of **\$23.1 million** in Federal Highway Administration aid was obligated for various local and state highway, bridge, and trail project phases in Ulster County in FFY 2025. Of that, **\$19.6 million** in federal aid was obligated for state projects in 2025 with the remaining **\$1.8 million** obligated for local highway, bridge and enhancement projects in 2025 across a variety of federal fund sources. Finally, a total of **\$1,665,000** in federal aid was obligated for transit projects in Ulster County.

UCTC works closely with NYSDOT to ensure that all Federal funding for transportation projects is obligated as scheduled. “Unobligated” federal funding does not carry over into the next FFY, rather, it expires at the end FFY if unclaimed by the project sponsor. Unobligated federal funds represent an opportunity cost for other Ulster County municipalities that may be waiting to receive federal aid for a project. In this sense, projects programmed but not acted upon hold up federal funding that could otherwise be utilized by other project sponsors waiting for federal aid, underscoring the importance of ensuring an annual obligation rate of 100%. UCTC staff will continue to work closely with NYSDOT and local project sponsors to stay on top of project priorities and help sponsors move their projects to implementation. Staff will also continue to assist project sponsors with the identification of unused federal aid and process TIP amendments to modify transportation priorities to help utilize federal aid obligation authority before it expires.

The tables below display the project PIN, sponsor, title, phase(s), funding source, authorized amount, FFY, MPO, and County. Projects are divided into tables by NYSDOT, local, and transit projects. Some projects have multiple rows for multiple phases and funding sources. Authorized amounts with brackets indicate a de-obligation of funds. Reasons for de-obligation include project completion with unexpended funds or movement of funds from one phase to another.
